DEADLINE FOR PUBLIC COMMENT ON A PROPOSED PLAN FOR A REMEDIAL ACTION PLAN FOR THE QUINCY SMELTER PORTION OF THE TORCH LAKE SUPERFUND SITE, HANCOCK, HOUGHTON COUNTY. Written comments are being accepted on a Proposed Plan for the Quincy Smelter portion of the Torch Lake Superfund Site. This site is the location of environmental contamination which is the result of copper mining and smelting operations and the on-site disposal of mine tailings (stamp sand) from the 1860s until the mines closed in 1968. Part of the environmental contamination at this location has been remediated through two emergency removal efforts by the Emergency Removal Branch of the U.S. Environmental Protection Agency (EPA). The remaining contamination at the site includes heavy metals in the stamp sands and slags which were discovered during site investigation activities. This proposed action is intended to allow the site to be redeveloped for year round recreational use. The Proposed Plan includes a permanent cover/barrier over the entire property in order to prevent direct contact with the contaminated stamp sand. The barrier includes clean soil, four to six inches thick, with a vegetative cover and gravel parking areas. Permanent markers will be installed detailing the presence of contaminated soil and prohibiting the disturbance of the protective barrier. A restrictive covenant will also be filed with the property deed which identifies the contamination, describes the protective barrier, and prohibits disturbance of the protective barrier and use of groundwater for domestic consumption. This plan is available for review at the Portage Lake Library in Houghton, MI. Written public comments should be received by the EPA no later than 5:00 pm, January 31, 2009. Mail your comments to: Pat Hamblin, U.S. EPA 77 West Jackson Blvd. Chicago, IL 60604.
